

U4E2. KENIA (interfaces)

ROJAS BADILLO EMILIO

The screenshot shows a Java IDE window titled "30 April 11:06 PM" with a battery level of 97%. The editor displays the source code for "protegido.java". The code defines a class "protegido" that extends "parque" and implements the "visible" interface. It includes a "subvencion" attribute, a constructor, and methods "getSubvencion", "setSubvencion", and "visitar". The "visitar" method is annotated with "@Override".

```
1 Main.java x 1 protegido.java x
16 public class protegido extends parque implements visible {
17
18     double subvencion;
19
20     public protegido(int kms, int num_especies, String nombre,
21                     double subvencion) {
22         super(kms, num_especies, nombre);
23         this.subvencion = subvencion;
24     }
25
26     public double getSubvencion() {
27         return subvencion;
28     }
29     public void setSubvencion(double subvencion) {
30         this.subvencion = subvencion;
31     }
32
33     @Override
34     public String visitar(String nombre) {
35         return nombre;
36     }
37 }
38 }
```

The output window shows the following text:

```
nombre: Animal1
caza@610455d6
zona protegida 2:
nombre: Animal2
caza@511d50c0
zona protegida 3:
nombre: zona protegida 1
protegido@60e53b93
zona protegida 4:
nombre: zona protegida 2
protegido@5e2de80c
zona protegida 5:
nombre: zona protegida 3
protegido@1d44bcfa
[emilio@user1012007][4.2]{main}$
```

The file name "protegido.java" is visible in the bottom left corner, and the time "17:18" is in the bottom right corner.
